SIZING CHART

Tentickle Stretch Tents are very versatile in the way they can be erected. The floor space varies in the size depending on whether the sides are up or down. Smaller tent sizes are therefore more suitable for canopy applications as the tent surface is not enough to pull the sides down, but this is changing with medium to large tent sizes. We have demonstrated on the next page the 4 most common pitch styles that can be achieved with a 15m x 12m stretch tent.

We are able to custom manufacture any tent size in accordance with the needs of our clients or to fit a particular venue space. The sizing chart below shows the most common standard sizes of Tentickle tents used by rental companies around the globe.
